Industry Insights

The shortage of skilled Data Analysts is a real and pressing challenge, much like other supply chain issues. At its core, it's a matter of supply and demand. The supply remains limited due to the relatively recent rise of the profession.

There are no Data Analysts with 30 years of experience, and even finding someone with a decade in the field is rare. Called "one of the most in-demand jobs of the 21st century," Data Analytics continues to see rapid growth. According to the US Bureau of Labor Statistics and the World Economic Forum, around 11.5 million data-related roles are expected to be created globally by 2026. Yet, despite this demand, nearly 80% of professionals struggle to work effectively with real-world data due to a lack of practical experience.

This is where Jason steps in—bridging the gap between aspiring talent and job opportunities. Jason equips learners with the practical skills and industry-relevant knowledge they need to thrive in the fast-evolving field of Data Analytics.

Trainers with Real Industry Experience

At Jason, you're guided by professionals who've spent over 10 years in the tech industry—not by traditional teachers. Our mentors actively work on current technologies and bring that practical experience straight to your sessions.

Global Curriculum Aligned with MNC Standards

Our curriculum is crafted to meet the current demands of the job market. It is regularly updated based on feedback from industry experts, ensuring you're always learning what's most in demand.

Modern Infrastructure & Flexible Learning

With fully equipped classrooms and labs across key locations, Jason provides a learning environment that supports both in-person and blended training. We're open all week with extended hours for career counseling and support.

Project based, Job-Ready Training

Every course includes live projects, real-world use cases, and hands-on practice. Our approach is 80% practical, giving students the confidence and skills to handle job responsibilities from day one.

Complete Job Placement Support

We don't just teach — we guide you to your first job. Our placement team assists with resume writing, mock interviews, LinkedIn profile creation, and connects you to job opportunities through our hiring network and alumni base.

Trusted by Thousands of Students

Jason's training has helped thousands of students build successful careers. Our student feedback, referrals, and placement success stories speak for themselves.

Global Certification Support (Microsoft, AWS, Pearson VUE)

In addition to our course completion certificate, we assist students in preparing for and earning globally recognized certifications from Microsoft, AWS, and through Pearson VUE.

Dedicated Support

Whether it's a technical doubt, class issue, or career question, our support team is available 7 days a week via phone, WhatsApp, or email. Your journey is always guided and never alone.

Proven Student Satisfaction

Thousands of learners have successfully launched careers through Jason. Our consistent placement record and high ratings are a reflection of the trust students and employers place in us.

Way of Learning at
Jason School

Alumni Support & Upskilling

Even after placement, students stay connected through lifetime access, advanced learning sessions, freelance/project opportunities, & networking within the Jason alumni community.

05

Placement Support

With polished resumes & confident interview prep, students begin applying to jobs through guided support, active tracking, and access to verified job leads and HR connections.

04

Career Services & Certification

As technical training wraps up, students shift focus to building their professional profiles, completing unguided projects, developing soft skills, & preparing for global certification exams.

03

Training Phase

Students engage in structured live sessions, daily practice & guided projects that focus on building strong analytical thinking, problem- solving abilities, and tool-handling confidence.

02

01

Enrollment & Orientation

Students kickstart their journey by registering, attending orientation, joining communication groups, and setting up their tools and resources for a smooth learning experience.
